PROFESSIONAL EXPERIENCE

Mekari - Jakarta, Indonesia

June 2025 - Present

Software Engineer 1 (Junior Software Engineer)

- Co-developed an AI-assisted end-to-end development workflow spanning PRD creation, technical planning, implementation, and manual and automated testing, enabling engineers to own the full feature lifecycle and reducing delivery time by ~5x, from ~2 months to ~1.5 weeks.
- Developed and maintained production features across 25+ microservices powering Mekari's low-code and no-code platform, used by hundreds of businesses and handling 500K+ requests daily.
- Built internal deployment tooling that unified multi-tenant and single-tenant release workflows, enabling dedicated customer environments to be provisioned and deployed through a single process while reducing end-to-end deployment time by approximately 60%.
- Implemented end-to-end distributed tracing with Datadog across 25+ microservices, including PostgreSQL, MongoDB, and Redis transactions, reducing root-cause identification time by approximately 40%.
- Redesigned the unit testing CI pipeline, reducing execution time by 50% and introducing automated code coverage validation to prevent regressions and maintain code quality.

Bosnet Distribution Indonesia - Jakarta, Indonesia

January 2025 - June 2025

Software Developer Intern

- Modernized 6 critical modules by migrating them from a legacy desktop application to a responsive web interface using the company's internal component library, achieving 100% functional parity.
- Developed and enhanced 10+ reusable UI components within the internal design system, improving interface consistency and accelerating frontend development across multiple product teams.

Gradient - Jakarta, Indonesia

January 2024 - January 2025

Software Engineer Intern

- Built an advanced search system with Typesense, indexing tens of thousands of documents and serving fast, accurate search results to an average of 1K+ daily users.
- Developed Gradient's mobile application, which has since surpassed 50K downloads across Google Play and the App Store.
- Built a semi-automated content generation pipeline using OpenAI APIs to generate transcripts and descriptions for 5K+ videos.
- Implemented rate limiting to protect platform APIs from abusive traffic and traffic spikes, improving system resilience for a platform now serving 25K+ monthly active users.

EDUCATION

University of Indonesia

Depok, Indonesia

Bachelor of Computer Science

August 2021 - July 2025

- **GPA:** 3.91/4.0, Summa Cum Laude.

TECHNICAL SKILLS

- **Languages:** Go • Java • TypeScript • JavaScript • Python
- **Backend:** Gin • Gorilla Mux • Django • Spring Boot • NestJS • Express.js
- **Frontend:** Vue.js • Next.js • React • HTML • CSS • Tailwind CSS
- **Mobile:** React Native
- **Databases & Caching:** PostgreSQL • MySQL • MongoDB • Firestore • Redis • Memcached
- **Cloud Platforms:** AWS • Google Cloud Platform (GCP) • Alibaba Cloud • Microsoft Azure • Firebase
- **DevOps & Observability:** Docker • Kubernetes • Bitbucket Pipelines • GitHub Actions • GitLab CI/CD • Jenkins • Argo CD • Datadog • Grafana • Sentry • PagerDuty
- **APIs & Messaging:** REST APIs • gRPC • Kafka

PROJECTS

CirrhoCheck

2024

- Served as Engineering Lead for a multidisciplinary development team, owning technical design and implementation of a clinical decision-support system that was deployed at Cipto Mangunkusumo General Hospital (RSCM).
- Built an automated mortality-risk assessment workflow for cirrhosis patients based on a published clinical scoring formula developed by an RSCM physician, replacing manual risk calculations with automated analysis.
